

Essay Writing Competition 2nd runner-up

Congratulations to Stephanie Villaeba Gurung of 5A who recently won the 2nd runner-up in an essay writing competition (English Division) organized by the Centennial College, an independent College established by The University of Hong Kong (HKU). The topic was, “What role might Hong Kong play in supporting ‘Global Sustainable Development’?” In fact, climate change, environmental degradation and biodiversity are a few of the much-debated environmental challenges the global community is facing today. Our school has always encouraged students to reflect on the relationship between humans and nature. Stephanie offers a good analysis in her writing on the Hong Kong situation in terms of the linkages and balance that exist between economic, social and environmental factors.
